

DATA MODELING EXERCISE

Prepared by Jack G. Zheng for IT 4153

INSTRUCTIONS

1. Follow the Visio tutorial to complete the exercise. After this exercise, you should be able to use a modeling application like Visio to design database structures.

- Tables, columns, primary keys, composite keys, relationships (foreign keys), column definitions, relationship properties.

2. EER exercise (use Visio if you like)

- Think about these types of people in SPSU:
 - Student: full time, part time, graduate, undergraduate, current, prospective, etc.
 - Student employee: student assistant, GRA, GTA, etc.
 - Faculty: tenured, tenure track, visiting, PTI, non-teaching
 - Staff: full time, part time, admin
 - Alumni
 - Others: parents, family member, emergency contact, etc.
- How do we model the scenario?
 - Faculty: tenured, tenure track,

3. What data structure level to use for the following data?

- Company, ZIPCode
- Composite attribute: Name, Address, Date, etc.
- Multi-Value Attribute: skills, table of contents, etc.

4. EAV experience: how to model the following data?

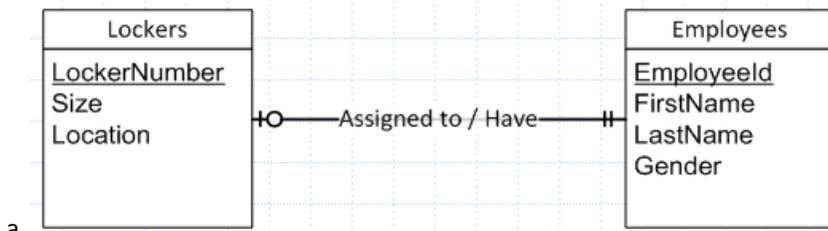

- In a simple test bank, there are many multiple choice questions. Each question has title, body, 4 choices, and the answer.
- http://spsu.edu/itdegrees/permanent_schedules/undergrad_perm_sched.htm

5. Primary key

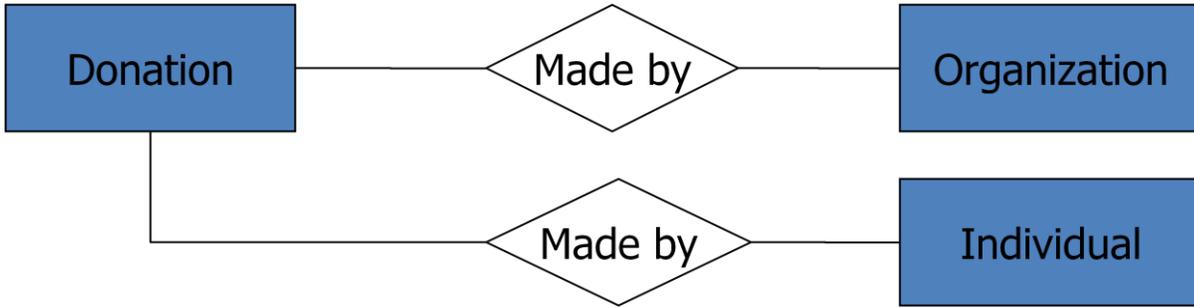

- http://spsu.edu/itdegrees/permanent_schedules/undergrad_perm_sched.htm: How would you design the PK? Would you use a surrogate key?
- How would you design the PK?

DATE	TIME_START	TIME_END	ROOM	EVENT_NAME	PARTY_OF
6/17/2012	11:00AM	2:00PM	Allure	Burton Wedding	60
6/17/2012	11:00AM	2:00PM	Bonanza	Adams Office	12
6/17/2012	3:00PM	5:30PM	Allure	Smith Family	15
6/17/2012	3:30PM	5:30PM	Bonanza	Adams Office	12
6/18/2012	1:00PM	3:00PM	Bonanza	Boy Scouts	33
6/18/2012	11:00AM	2:00PM	Allure	March of Dimes	25
6/18/2012	11:00AM	12:30PM	Bonanza	Smith Family	12

6. How to design tables and keys in the following cases:

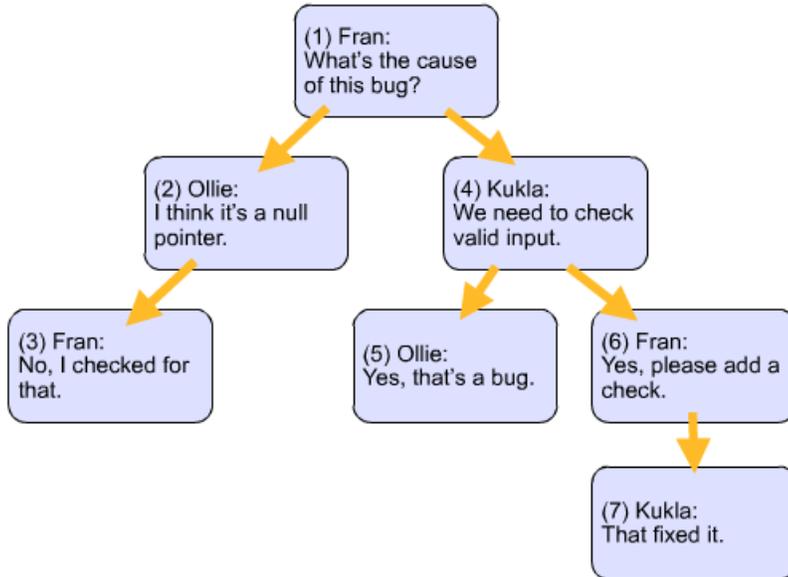

a.

b.

c.

d.
